

CUNY Design Project

Stage 1: Program Pages

Design the interface for the program pages

Each program page must include the following interface elements:

Header, main navigation, main content area, footer.

[Content for program pages.](#)

REQUIREMENTS

- All pages must share the same layout and overall design.
- Design must adapt to different screen sizes.
- Include all text provided.
- Include an image with every page.
- HTML code must be validated and correct.
- All styling must be achieved with CSS.

STEPS

1. Create two mockups in your choice of Adobe application (Adobe XD, Illustrator, InDesign or Photoshop). One for desktop (landscape) and one for mobile (portrait).
 - a. Define color scheme.
 - b. Define Typographic scheme, including font(s) choice (maximum two fonts), font sizes, weight and color for all text elements
 - c. Design a header that include the website name: CUNY Design
 - d. Design a navigation bar in a horizontal format for desktop, and vertical format for mobile
2. Code the HTML and CSS for one of the program pages.
3. Use the first program page as a template for all others.
